IFMR Graduate School of Business

IFMR Graduate School of Business (GSB) builds on the robust five-decade legacy of IFMR, strengthened by Krea University's forward-looking vision to drive meaningful change in a rapidly evolving world. With a strong foundation in high-quality management education and sector-focused research, the MBA programme at IFMR GSB is deeply rooted in this tradition of academic excellence.

Guided by the principles of Interwoven Learning, IFMR GSB equips students with critical, analytical, quantitative, integrative, and ethical thinking skills. This multidimensional learning approach prepares students to navigate rapid change, address the intricate relationship between business and society, respond to diverse stakeholder expectations, and emerge as capable professionals and transformative leaders.

Professor Lakshmi Kumar

Dean, IFMR GSB, Krea University

IFMR GSB: A Legacy of Excellence

At IFMR Graduate School of Business, we take immense pride in our consistent placement record. For 24 years, we have maintained near 100% placements, year on year. This year our average CTC is Rs 12.04 lakhs. This has been due to the global macro slowdown and consequently the numbers hired. We have increased the number of recruiters by about 20% which was driven by our strength in our academic rigour and industry relevance. Our curriculum is designed to be both dynamic and future-ready—seamlessly integrating core business disciplines with innovative, interdisciplinary courses in communication, design thinking, and ethics. Grounded in research and enriched with contemporary case studies, our learning approach is delivered by a highly accomplished faculty.

The success of our placements is a direct outcome of this strategically curated academic experience and the dedicated efforts of our placement team, led by Professor Nagarani and supported by our faculty, staff, and an enthusiastic student placement committee. Together, they have built and sustained strong industry relationships that translate into valuable career opportunities for our students. We have consistently attracted top global firms such as JPMorgan Chase, Deloitte, Ernst & Young, Wells Fargo, Barclays, Societe Generale, Brandfolio, Shell among others—offering coveted roles in areas like risk management, consulting, analytics, and regulatory reporting.

Our students' exceptional performance during internships has led to a steady rise in Pre-Placement Offers (PPOs), further validating the industry's confidence in IFMR GSB talent. The growing involvement of our alumni in recruiting current students is a testament to the strong sense of community and the high regard in which they hold their alma mater. With a strategic focus on emerging and high-impact fields such as quantitative finance, data science, fintech, and sustainability, IFMR GSB is poised to continue attracting top-tier companies and delivering even greater value to our students in the years ahead.

Professor Nagarani M

Head, Corporate Relations and Career Services
IFMR GSB, Krea University

At IFMR GSB, we recognise that building strong industry relationships and corporate partnerships is central to our mission of delivering career-ready professionals. Over the years, we have developed collaborations with a diverse array of organizations, leveraging their expertise across research, executive education, management training, and consultancy. These strategic partnerships not only enrich our academic ecosystem but also translate into tangible career opportunities for our students.

Our Career Services and Corporate Relations Office actively engages with industry leaders to coordinate a wide range of activities — from campus recruitment drives and leadership talks to live projects and collaborative events. These engagements are designed to provide students with real-world exposure and ensure recruiters gain access to top-tier talent.

We place a strong emphasis on student preparedness through continuous skill development initiatives. Our students undergo rigorous training in group discussions, public speaking, aptitude assessment, business communication, and interview techniques. Personalised coaching, mentorship programs, and mock interviews ensure that each student is well-equipped to meet dynamic industry demands.

Our structured approach to industry engagement — beginning with immersive summer internships and culminating in final placements — ensures a holistic progression. We aim to align the aspirations of our students with the evolving talent needs of our recruiting partners. The continued trust placed in us by reputed organisations across sectors stands as a testament to the quality of our talent and the strength of our industry collaborations.

“We remain committed to nurturing mutually beneficial partnerships that drive value for both our students and the corporate world.”
